OBJECTIVES OF THE SYMPOSIUM

Too often, community leaders focus on the issues of today, instead of clearly visioning the future. As an aid to seeing the path to the future, the City of Jacksonville's Environmental Protection Board (EPB) and the University of North Florida are proud to present the 2011 Jacksonville Environmental Symposium: ***Building a Greener Quality of Life***. The symposium will bring together residents, government agencies, utilities and innovators in a forum designed to foster an atmosphere of cooperation in environmental achievement.

BACKGROUND AND INFORMATION

This symposium presents a unique opportunity for members of the community to interact with the regulatory agencies responsible for developing and implementing environmental policy. Residents will also have an opportunity to better understand environmental goals for our community. The symposium will provide valuable opportunities for communication and help to further the goal of protecting limited natural resources and improving the quality of life in Northeast Florida.

THIS SYMPOSIUM WILL BENEFIT

- Environmental professionals, managers, auditors and coordinators
- Environmental engineers, planners and consultants
- Environmental health and safety professionals
- Plant managers, operators, regulatory affairs and compliance officers
- Environmental attorneys
- Environmental service providers
- Residents concerned about the environment

"A perfect summer day is when the sun is shining, the breeze is blowing, the birds are singing, and the lawn mower is broken."

— James Dent
