

Water Resource Funding in Florida

August 2009

The Florida Department of Environmental Protection provides financial assistance to local governments and certain other entities to upgrade, expand or build wastewater, stormwater, and drinking water facilities or implement various other water quality improvement projects.

- **Clean Water State Revolving Fund (SRF) loan program** provides low-interest loans to local governments to plan, design, and build or upgrade wastewater, stormwater, and nonpoint source pollution prevention projects. Certain agricultural best management practices may also qualify for funding. Discounted assistance for small communities is available. Interest rates on loans are approximately 40% below market rates but vary based on the economic wherewithal of the community. The Clean Water SRF is Florida's largest financial assistance program for water infrastructure. More information is available at www.dep.state.fl.us/water/wff/cwsrf or contact Tim Banks at 850.245.8358 or timothy.banks@dep.state.fl.us.
- **Drinking Water SRF loan program** provides low-interest loans to local governments and certain private utilities to plan, design, and build or upgrade drinking water systems. Discounted assistance for small communities is available. Interest rates on loans are as much as 40% below market rates. More information is available at www.dep.state.fl.us/water/wff/dwsrf or contact Paul Brandl at 850.245.8373 or paul.brandl@dep.state.fl.us.
- **Small Community Wastewater Facilities Grants Program** provides grants to fund the construction of wastewater facilities in municipalities with 7,500 or fewer people and *per capita* income levels below Florida's average *per capita* income. A local match is required. The program is linked to the Clean Water SRF program outlined above, and is highly competitive. More information is available at www.dep.state.fl.us/water/wff/cwsrf/smalcwgp.htm or contact Tim Banks at 850.245.8358 or timothy.banks@dep.state.fl.us.
- Florida's **Section 319 grant program** administers funds received from EPA to implement projects or programs that reduce nonpoint sources of pollution. Projects or programs must benefit Florida's priority watersheds ("impaired waters") and local sponsors must provide at least a 40% match. Eligible activities include demonstration and evaluation of urban and agricultural stormwater best management practices, stormwater retrofits, and public education. More information is available at www.dep.state.fl.us/water/nonpoint/319h.htm or contact Heather Ritchie at 850.245.8682 or heather.ritchie@dep.state.fl.us.
- Funding for projects related to the implementation of **Total Maximum Daily Load (TMDL)** determinations is available through a changing distribution of documentary stamp revenues, or other revenues, to the DEP. The program prioritizes stormwater retrofit projects to benefit impaired waters, somewhat along the lines of the previously mentioned Section 319 grant program. Information is available at www.dep.state.fl.us/water/watersheds/tmdl_grant.htm or by contacting Eric Livingston at 850.245.8430 or eric.livingston@dep.state.fl.us.
- Most years, typically from mid-December to mid-January, the Florida Legislature solicits applications for "**Community Budget Issue Request**" projects, including water projects. This process is an opportunity to secure legislative sponsorship of project funding through the state budget. The legislature coordinates applications with the department although the department has no authority in the selection of projects for funding. For more information, see

www.dep.state.fl.us/water/ and look for the link to legislative funding or contact Geof Mansfield at 850.245.8339, 850.245.3144 or geofrey.mansfield@dep.state.fl.us. Information on contacting Senators and Representatives is available at www.leg.state.fl.us.

There are a number of other programs at both the state and federal levels that offer the possibility of water infrastructure funding. These include:

Florida Department of Community Affairs **Small Cities Community Development Block Grant (CDBG) Program** – Funds are available annually for water and sewer projects that benefit low and moderate income persons. Projects providing new service have a higher priority than upgrades of existing facilities. Available matching funds also are considered. The maximum grant amount is \$600,000 - \$750,000, depending on income levels. Moneys also are available for water and sewer projects that serve a specific “job-creating entity” as long as most of the jobs created are for people with low or moderate incomes. For more information, visit www.floridacommunitydevelopment.org/cdbg/index.cfm or contact Jackie Dupree at 850.487.3644 or jackie.dupree@dca.state.fl.us.

Florida Rural Water Association Loan Program – This program provides low-interest bond or bank financing for community utility projects in coordination with the DEP SRF program discussed above. Other financial assistance may also be available. For more information, visit www.frwa.net/ and look for the link to “long term financing” or contact Gary Williams at 850.668.2746 or gary.williams@frwa.net.

Enterprise Florida Rural Infrastructure Fund – Enterprise Florida’s program is a resource for rural communities to facilitate the creation, capital investment, and strengthening and diversification of rural economies by promoting tourism, trade and economic development. It is intended to provide additional financial assistance to enable rural communities to better access other infrastructure funding programs. For more information, visit www.eflorida.com/financialadvantages or contact Bridget Merrill at 850.922.8655 or bmerrill@eflorida.com.

Florida’s **five regional water management districts** also offer financial assistance for a variety of water-related projects, for water supply development, water resource development, and surface water restoration. Documentary stamp revenues, or other revenues, may be made available periodically to fund **Alternative Water Supply Development** and, perhaps, Surface Water Improvement and Management (SWIM) projects. The amount of funding available, matching requirements and types of assistance may vary from year-to-year. For information on funding opportunities, contact the water management district with jurisdiction in your area—see www.dep.state.fl.us/secretary/watman for a map and links to each of the districts.

U.S. Department of Commerce **Economic Development Administration (EDA) Public Works and Development Facilities Program** – The program provides funding to help distressed communities in economic decline revitalize, expand, and upgrade their physical infrastructure to attract new industry, encourage business expansion, diversify local economies, and generate or retain long-term, private sector jobs and investment. The program focuses on redeveloping existing infrastructure. For more information, visit www.eda.gov/InvestmentsGrants/Investments.xml or contact Lola Smith at 404.730.3013 or lsmith2@eda.doc.gov.

U.S. Department of Agriculture **Rural Development Rural Utilities Service (RUS) Guaranteed and Direct Loans and Grants** – This program provides a combination of loans and grants for water, wastewater, and solid waste projects to rural communities and small incorporated cities with populations of 10,000 or fewer. Some nonprofit entities also may be eligible. To qualify, applicants must be unable to obtain financing from

other sources or through their own resources at reasonable rates and terms. Projects must benefit rural users and funding is provided in a combination designed to reduce rates to a reasonable level, as determined by the RUS. For more information, visit www.usda.gov/rus/water/ or contact Michael Langston at 352.338.3485 or michael.langston@fl.usda.gov.

Congress – State and Tribal Assistance Grant Program provides the opportunity to secure Congressional sponsorship of project funding, including water project funding, through the annual federal budget process. The program’s stated purpose is to strengthen state, local governments, and tribal abilities to address environmental and public health threats while furthering environmental compliance. See <http://www.epa.gov/Compliance/state/grants/stag/opportunities.html>. You may want to consider contacting your Representative or Senators for assistance in pursuing funding; see <http://thomas.loc.gov/links/>.

You may also want to review:

- **Grants.gov** at <http://www.grants.gov/>, which is the official federal website for information on more than 1,000 federal grant programs.
- **Catalog of Federal Domestic Assistance** at <http://www.cfda.gov/>, which provides a database of all federal programs available to state and local governments; public, quasi-public, and private profit and nonprofit organizations and institutions; specialized groups; and individuals. There are a variety of sources of niche funding that may be appropriate to your situation. There are also private funding sources (endowments, private trusts, etc.) that may, on occasion, fund water-related projects; a variety of sources to investigate these opportunities are available on the web.
- **The Florida Resource Directory** at <http://www.floridaresourcedirectory.org/>, which provides a searchable directory of information about and links to many state and federal programs with resources available to help local communities. Funding for water-related projects is just one of many types of assistance identified here.

If you are interested in **disaster relief**, your first contacts should be to **Florida’s Division of Emergency Management** at 1.800.342.3557, or visit <http://www.floridadisaster.org/>; and the **Federal Emergency Management Agency** at 1.800.621.FEMA (3362), or visit <http://www.fema.gov/government/grant/pa/index.shtm>, where the process for securing disaster-related infrastructure assistance begins.

If you have general questions about financial assistance unrelated to any particular program, please contact Geof Mansfield with the Department of Environmental Protection at 850.245.8339, 850.245.3144 or geofrey.mansfield@dep.state.fl.us.
